MedtecLIVE

5.-7.5.2026

LEADING EUROPEAN EXHIBITION FOR
THE DEVELOPMENT AND MANUFACTURE
OF MEDICAL TECHNOLOGY

PRESS RELEASE

January 2025

MedtecLIVE Innovation Expo at MedtecSUMMIT 2025

The MedtecLIVE Innovation Expo will be held on 18 and 19 February 2025 as part of the highly regarded MedtecSUMMIT international congress in Nuremberg. This accompanying exhibition will provide a platform for exhibitors to showcase the great power of innovation of this sector. This is a ground-breaking event that brings the medical technology sector together right at the beginning of the year.

The highly regarded MedtecSUMMIT innovation congress, organized on behalf of the Bavarian State Ministry for Economic Affairs, Regional Development and Energy, is where international experts from the fields of industry, science, policymaking and medicine gather to discuss the latest industry trends and solutions to current challenges. Subjects include ground-breaking themes such as clinical robotics, biomaterials and the use of health data. Dr Jörg Traub, head of Specialization Field Health at Bayern Innovativ GmbH, describes the congress: "For many years, MedtecSUMMIT has been established as a central platform for networking and promoting innovations in the healthcare sector. We are very pleased to be able to work together with the relevant players at this event to shape the future and provide a high-quality accompanying exhibition for direct, on-site networking in the form of the MedtecLIVE Innovation Expo, a key member of the MedtecLIVE Brand Family."

Silke Ludwig, Manager MedtecLIVE at NürnbergMesse GmbH, adds: "We are also very happy to present the MedtecLIVE Innovation Expo as the first Brand Family product of 2025 in conjunction with our honorary sponsor Bayern Innovativ GmbH. The exhibition is the perfect complement to the main event, since it offers participants the opportunity to make direct contact with leading manufacturers and developers in the sector and experience the latest innovations first-hand. Top-level networking, in other words." What's on offer covers the entire process, from the idea at a scientific level to establishing innovative products on the market, and is thus a perfect fit for the Congress delegates.

MedtecLIVE

The exhibiting companies will utilize the opportunity to present their innovations to an audience with an R&D focus, to learn about innovations and functioning innovation processes in the technology and science nexus of Nuremberg-Fürth-Erlangen, and to engage in depth with experts from the worlds of industry, application, science and policymaking. The MedtecLIVE team will also be represented with its own information stand.

Other MedtecLIVE Brand Family events

Another highlight in the MedtecLIVE Brand Family this year is the MedtecLIVE Healthtech Pavilion at automatica/LASER World of PHOTONICS, taking place in Munich from 24 to 27 June 2025. This will be the first time that this medtech-focused pavilion will be at the trade fair. It will enable participating providers to tap into new application areas and target groups. The next MedtecLIVE, the leading European exhibition for the development and manufacture of medical technology, will be held in Stuttgart on 5-7 May 2026. Starting now, in every second year MedtecLIVE will offer an excellent platform where OEMs and distributors can learn about the latest developments and industry trends directly from leading providers, SMEs and also startups, and gain a comprehensive overview of the entire medical technology value chain. The MedtecLIVE Community keeps exhibitors and visitors informed and in discussion all year round. This platform, available 365 days a year, uses algorithms to ensure a match between the interests of participants and the relevant products and services on the part of the exhibitors.
